

Melba Ketchum

2:17am

With their lifestyle, they have their eyes on God more than we do.

Melba Ketchum

2:25am

I have to come to peace with what I have learned because as with all things, it has to be in harmony with God. This falls outside of my neat little box containing my faith and all that I believe. I will keep pursuing this until I can learn enough to be sure of what they are. There is no reference in the Bible to them and only the Nephilim as human hybrids since that is clearly what they are. And yes, they date to Biblical times. With H haplotypes, it means 6 to 15K years ago.

Melba Ketchum

2:27am

this is one of those things. I have asked God to reveal it to me so I can have a peace over it. They are not relic peoples at all. The DNA shows that. They are not apes. They are maternally human. What do you think honestly, now that you know.

Melba Ketchum

2:28am

I am assuming you believe me about the supernatural stuff.

Melba Ketchum

2:30am

No, it is not annoying at all. I am a skilled diagnostician and always have been so I know what you are saying. What I am saying is that I have gone from a non-believer in this phenomenon to a believer because of the preliminary DNA, and now I have all of this interaction as well as crazy unknown DNA. So, do you see why I am so perplexed?

Melba Ketchum

3:01

I wouldn't want to be like the millionaires I have met. They do not know God. Not worth it. I have starved doing this project as I didn't charge for my time. I know it will pay off in some way though.

I also put a bunch of my own money into this.

yes you are blessed to have a good family.

As I said, I only have BF right now, but that is more than I can handle, LOL.

Melba Ketchum

1:57am

They know and believe in the "Creator" and also know and believe in Jesus. They even have a ceremony where they wash their newborns, ie baptism.

It is not just washing, it is ceremonially done.

They have mind spoken this to more than one habituator. I plan on asking about all of this in depth when I can actually physically speak with TaShona.

I am in a very interesting position. Not only am I getting a lot of info from mine, but the habituators are coming out of the woodwork and talking to me. They all have remarkably similar stories.

Melba Ketchum

2:02am

They have govt and elders also, one said to my prophet friend, Many men come, many men go, many try to find me but only once will I meet. The councils have been meeting trying to decide if they will meet with us.

Melba Ketchum

2:03am

I don't even want a picture particularly. I do not want to insult her. I have other friends that do, thus the camera in the invisibility lesson.

why?

Melba Ketchum

2:04am

You realize, I am only theorizing anyway. They are supernatural. Not only have I experienced it first hand, but so have those I am close to.

Melba Ketchum

2:06am

You also need to understand, it doesn't have to be Og per se. It could be the descendents of any of the giant races. They were basically wiped out, but what if some of them survived, yet another reason for them to go feral.

Melba Ketchum

2:08am

I absolutely make no claim that I know it all or I am correct. Here are the facts I know for sure: 1. they are giant 2. their DNA is not in the same family tree as man or animal 3. they have supernatural gifts so go figure. I am open to suggestions.

Melba Ketchum

2:17am

My dear prophet friend, who is an ordained pastor by the way, and I have had prolonged discussions about all of this. She is careful, as I have been. But only God has control of me. She has spiritual gifts and so does TaShona. I feel they are really close to God because they are not polluted by TV and all the other trash we allow into our lives.

Melba Ketchum

1:45am

The translation in the original Aramaic says that they were heroes

King Og was from a race of giants and his bed was 16 feet long.

ie nephilim

Melba Ketchum

1:47am

For only Og king of Bashan remained of the remnant of giants; behold, his bedstead was a bedstead of iron; is it not in Rabbath of the children of Ammon? nine cubits was the length thereof, and four cubits the breadth of it, after the cubit of a man.

No, but I believe that they are. Like many things, you just have to believe God for answers for sure. So far, this is what I have come up with

The only other explanation is alien.

I don't even want to go there.

Melba Ketchum

1:50am

Do you have e-sword?

I love it

The giants were killed out and chased off. I think this is when they went feral.

But that is speculation.

Melba Ketchum

1:53am

One other thing, what garden variety Christian are you? I am non-denominational. No, that is all old Testament. They love God and Jesus has come since all of that. With him coming for us humans, and they are part human, then I believe he came for them also. They have a Christian faith.

Melba Ketchum

1:54am

Most habituators will tell you that.

All will tell you that they are spiritual.

They mind spoke to a friend of mine who is a "prophet" ie christian psychic. and told her that she had the skekina (I know I spelled it wrong) light of God around her. They could see it.

They know she is special and said not to fear, that they would never hurt her.

Melba Ketchum

1:37am

They have told us a lot of things about their origins. Most habituators know that they are an angel cross. They will tell you that they are a star people and that God sent them here basically from another dimension. They were to watch over us but some mated with us.

Melba Ketchum

1:37am

The bad ones are probably the leftovers of the bad Nephilim

I am not sure though.

I do not doubt that some have been killed. After all, they are part human and I am sure inherited our sin nature.

Melba Ketchum

1:38am

They have very strict rules in their society though.

Melba Ketchum

1:39am

There were two reasons some survived.

Some of them could still jump dimensions so they got out and the others went underground. They still live underground and hide the entrances by making it invisible to us as humans, just like they made my friend invisible.

Melba Ketchum

1:42am

They also make shelters for when it is nice out, but generally they live underground or so we have been told and also one of us saw a large cave like opening and looked back and it was gone.

He killed everything on the surface of the earth.

Melba Ketchum

1:43am

In Gen 6 it says that there were giants on the earth then, and still are today.

Goliath was a giant, he was post flood.

Melba Ketchum

1:43am

No, I think he destroyed those fathered by the fallen angels or demons.

Melba Ketchum

1:44am

These were the men of renown sired by the watchers

What about King Og?

Melba Ketchum

1:24am

I just love TaShona though, I can't help myself.

Are we talking about the alleged half breed from China?

Melba Ketchum

1:26am

I know, it will do that. They also have a new trick. They woke me up at 5:30 in the morning the other night telepathically speaking in their native tongue to me. Then they howled outside my window twice.

I was just too tired to go out. No sleep these days dealing with the paper.

Melba Ketchum

1:28am

They have these big bulbous toes like some old Black people have.

I am near Nacogdoches.

There are a lot of them here.

Melba Ketchum

1:30am

I have spoken with 2 different people that had a gun on one and were told telepathically not to shoot and another asked why he was carrying a gun so that is 3

You know the bulge on the eastern side of the Texas border? I live in that bulge.

Melba Ketchum

1:31am

They can read your mind!

These people were scared and ready to shoot them.

Melba Ketchum

1:31am

The mind speak is in perfect English by the way.

Melba Ketchum

1:32am

Or whatever language you understand

Yes, they are not going to hurt you.

Melba Ketchum

1:33am

They are part angel I believe and since the angels were with God, they were able to keep the supernatural abilities.

How many are really true and documented?

A friend asked her teacher if there were bad ones. He said "I will not speak badly of my people, but there are those that are confused, just like there are those of you that are also confused."

Melba Ketchum

1:14am

She gifted my bloodhound with a young chicken one night.

They cannot breed well with us anymore according to them. I can understand that because most of the human DNA is bred out. They are too different now. They said that they didn't used to be that different.

Melba Ketchum

1:16am

I didn't have a choice, they already gave it to her and she wasn't about to let me have it. It was young (from a local chicken house no doubt) and was apparently alive when they gave it. She likes them.

No, only the tales that we all know about Zana and some Native Americans.

I feel the female hybrids are not as successful as the males according to my studies.

..

Melba Ketchum

1:18am

And looking into the stories of the hybrids. After seeing the DNA, they should not be able to mate easily with us at all.

Melba Ketchum

1:19am

DNA would be very interesting, especially a karyotype

Why?

What was wrong with the female?

Another weird DNA factoid: They have single stranded gaps in their double stranded nuclear DNA.

Melba Ketchum

1:21am

The peer reviewers didn't like that so they are making us remove it. We had electron microscopy done.

Well, nuclear DNA would certainly tell their story.

Melba Ketchum

1:23am

Haven't we all?

I think about my life now and I just shake my head. What in the world was God thinking when he mixed me up in this?

Sometimes I still resist.

Melba Ketchum

1:03am

You have to show respect. Go out where they are, pray and sing. I preach to them and pray over them. They love it. I just relax and they surround me, right in the treeline about 20 feet from me. I see them moving when I stop but they are still as long as I am speaking and singing.

Melba Ketchum

1:05am

Not all tribes believe that way. Also, it is human nature to be afraid of something so large and scary looking. I just bucked up and made up my mind I wouldn't be scared. As much as I have been out in the rural area at night. If they wanted me, they would have already had me. LOL

Melba Ketchum

1:07am

I know it is difficult to believe. I have had a real hard time dealing with this as it goes against what is science and what I had previously believed in my life. But they are what they are. My girl's name is TaShona. Some people call her my "teacher".

Melba Ketchum

1:08am

I know that there are tribes of them that do not like people.

My group is just so sweet though. Sounds crazy I know.

There are those that just want to be left alone. The occasional rogue is aggressive.

Melba Ketchum

1:09am

Almost a year. I didn't see her at all during deer season, I don't blame her. She has a baby.

Melba Ketchum

1:11am

She loves to take the little one and splash in my water trough in summer. She also left the water on a few times. I asked her to please turn it off and it hasn't happened since.

Melba Ketchum

1:11am

It supports it in that they have DNA that doesn't align with anything. The DNA is not of this earth.

Yes, they are at my house but I do not want anyone to know that for obvious reasons.

The horses love her, nicker a greeting at her. She banged on the house one night, early on, scared the fool out of me. All of my dogs were dead silent, not scared but "knew" it was TaShona, thus no barking.

Melba Ketchum

12:53am

I have had physical encounters, felt the nausea and lightheadedness (which she stops when I tell her it is too much) and have seen her. She just has not approached me in the daylight. She is very large. About 10 feet and reddish.

No, she just pops in.

Melba Ketchum

12:54am

You will laugh but there are about 8 or 9 that come up when I show up. I have counted eyeshines and seen them move in silhouette.

Melba Ketchum

12:56am

The best example is if you read Raymond Moody's book "Life after Life" about near death experiences. The people talk about the telepathic communication on the other side. They say the answer is there before they ask the question.

It is like that, you don't hear a voice per se, you just suddenly know what is said and how they said it.

It just shoots inside your head.

Melba Ketchum

12:57am

Nothing I have ever experienced before.

Not all people get that far before coming back. I liked Betty Eadie, Embraced by the Light.

You will know when it happens, it is unique.

They are very advanced, they just hide it for the most part.

Melba Ketchum

1:00am

I have found a common link with people that they interact with most. They are either very spiritual or they are psychic. Everyone I have talked to with these types of experiences fall into those categories.

Melba Ketchum

1:01am

They do not trust us. We hurt the Native peoples that mostly had a good relationship with them. They see how we are. They can read our minds. Thus they always know where the cameras are.

Melba Ketchum

12:41am

I am having the alignment redone to confirm it is so far out. There is no ape, no Neanderthal. Do you understand now? They can telepathically communicate. They are adept at all things we are not. They can make you feel like the Holy Spirit has fallen on you with profound peace. I asked my female how she braided a wild horse's mane and asked her to gentle him. Within a week you could touch him all over. This past weekend, they shared the way they avoid cameras. They made a friend of mine disappear in the camera, though we could physically see him outside of the camera. They told us it was a lesson. He said it made him nauseous and lightheaded. He wasn't ok until the next day. They have told several people that do not know each other that they chose me to do this and that they know what is going on. It is their time to come out. I couldn't make this stuff up if I tried. I didn't even believe in them. They started by leaving me a gift of feathers in my car. The relationship is now strong. I love my big female, she has done everything I have asked her to do. They tell me she will step out and speak with me soon. I believe it. I have seen her but she is going to approach me and speak to me.

Melba Ketchum

12:47am

Yes, they are not living in our polluted world with all of the filth that goes on in it. I actually envy their simplicity and loyalty to family. They have gotten in my head and I have seen the night through their eyes, perfect night vision. I can't speak out about all of this because it would hurt everything, but I can promise, this is true. I am here to say it in front of God and everyone else.

Melba Ketchum

12:48am

She came to me within 10 feet behind a bush more than once. She was cautious at first. I have seen her walking at night around me, but I think what she means is that she is going to appear to me in the daylight. She has used telepathy to speak to me.

Melba Ketchum

12:50am

I cannot deny it though. That is why I say that the habituators are not crazy. I have experienced it all. They still have angelic powers, and yes, their eyes emit light.

I teased her one night that she was stinky and immediately she made me smell flowers and it was a drought, no flowers around. She does that now when she is close to me. A gift of sorts.

Melba Ketchum

10:49pm

One last thing, do you realize how mind blowing my data is going to be? Our team of scientists is still struggling with how to make it palatable in the paper. It is non-Darwinian, a first.

Oh yes, if you want the other hair in, please Fed EX it ASAP. We can get it screened and in the paper if we have enough DNA and it is real.

Melba Ketchum

11:05pm

Yes, that is why my team and I have stayed to ourselves. The research is not going to not line up with common thought. These things have less in common with us than a chicken though they came from us. Genesis 6 is the ONLY explanation unless you believe in little gray men and them doing genetic engineering. God has such a sense of humor.

Melba Ketchum

12:31am

Disotol? I know exactly what you mean. We will have to have a phone conversation one day. I will clarify what I know in detail at that time. I can promise you this. You are underestimating their capabilities. I personally believe that Jesus died for us all including them. They have Christian beliefs, did you know that.

Melba Ketchum

12:32am

The human DNA is all but gone on the nuclear side. Bred out or bred back to the unknown DNA. I am sure of what I have.

They only align 3% max with human. A chicken aligns 5%

This is not even a mammal if we just look at the percentages.

Melba Ketchum

10:21pm

Between us, we are about 8 weeks out I am thinking. We had to do a HUGE amount of testing for the peer reviewers and that slowed us down. We have it now (3 whole genomes) and we are doing the assembly and final work to put what we can in the paper so we can get it out. The paper is written and some of the whole genome stuff is in it already, they are way different than we thought. I am totally blown away by the findings. Anyway, hopefully we will have it back to the journal within 2 weeks and then the peer review should be 2 but I am sure they will find something wrong again (they do not want to pass it of course). It won't be too big though since we have 3 whole genomes. They can't really ask us for anything else. So, the deed is done, just last minute scrambling and resubmission. The editor has waited patiently. If this is a big sample or something and it could go in the paper, we need it NOW. Since it is from overseas, then that would be interesting although I think by and large, they will all be related in ways nobody can imagine.

Melba Ketchum

10:23pm

I have to tell you, if it is the Orang, I do feel that they are primates. Our critters are "unique". Ps I will not work with Meldrum, he has insulted me for the last time.

All of this stays between us.

I do not know the primatologist and there is no need of one between you and I. Nor an anthropologist either.

There I have said it, so you can figure it out from there. I hope you will trust me enough to share if it is going to impact my study.

Read Genesis 6.

If it is DNA, it is probably Paabo. I have no respect for him either as I tried to contact him as one scientist to another and was ignored like a red-headed stepchild.

One other thing while I am spilling the beans. I have become a habituator in the last year. Those types of folks are NOT crazy. I have now experienced it all. It is truly unbelievable.

I will hold you to the NDA on the R&T agreement on this. You cannot tell even your closest friends. I am trusting you. Something I seldom do anymore since the Richard Stubstad fiasco. By the way, he doesn't believe in God and is terminal with cancer. Please pray for him.

March 12, 2012

Melba Ketchum

8:31pm

Sorry I didn't get back to you on your last message. I have been so busy and I am deluged with email. No, Tim backed off after I confronted him probably, not anything to do with Paulides. I didn't want that to be answered on the other thread since Paulides was on it for some reason. There is no relationship with Paulides. I want that rumor to go away. For what it is worth, I am not dating at this time because 1. I do not have time and 2. I trust God for the right guy at the right time and 3. I am very comfortable on my own so it is not something pressing. There have been quite a few flirts on here but they are not for me. So for now, I am married to BF and am having his child and it has been very painful...LOL There you have more personal information about me than anyone except my closest circle. Please keep it to yourself though except the Paulides rumor. Not anyone's business. I appreciate the offer to join your group, after this is out, maybe, but for now I am scrambling like crazy to make it happen and give the peer reviewers everything that they are requiring in order to finish this thing. This must stay between us too. They gave us so much extra to do to satisfy them that it has greatly delayed us. We have it all now so it is a matter of putting it all in and sending it back. Hopefully, any next revisions will be just clerical stuff if they find anything. I am exhausted and ready for this to be over. Thanks so much for looking after Tim. He needs people and has none so I really appreciate it. Bless his heart.
